PROFESSIONAL SUMMARY

Versatile Software Engineering student at Haramaya University with a unique dual focus in Accounting and Finance. Experienced in full-stack development, specializing in TypeScript and Node.js. Proven ability to build real-time communication tools, financial tracking systems, and management software. Strong analytical skills derived from a technical and financial academic background.

EDUCATION

B.Sc. in Software Engineering | Haramaya University
4th Year Student (Current)

B.A. in Accounting and Finance | Haramaya University (Distance Education)
2nd Year Student (Current)

TECHNICAL SKILLS

- Languages: TypeScript, JavaScript, Node.js, SQL, HTML5, CSS3
- Frameworks/Libraries: React.js, Tailwind CSS, Express.js
- Tools & Technologies: Socket.io (Real-time), Git/GitHub, REST APIs, Database Management
- Finance: Financial Reporting, Ledger Management, Budgeting Logic

PROJECTS

Real-time Chat Application | TypeScript, Tailwind CSS, Node.js

Engineered a high-performance messaging platform with real-time data synchronization. Designed a modern, responsive UI using Tailwind CSS for a seamless user experience.

CryptoTracker System | Node.js, JavaScript, HTML/CSS

Developed a live cryptocurrency monitoring tool utilizing external APIs to fetch real-time market data. Created dynamic data displays to track price movements and trends.

School Payment Management System | Node.js, SQL

Developed a robust system to automate school fee collections, record-keeping, and payment tracking. Integrated accounting principles to ensure accurate financial reporting and data integrity.

Issue Reporting Application

Built a digital platform for submitting and tracking technical issues, improving resolution workflows.
